The velocity of this sprint is very pushed towards the end. This is because of midterms and the overall structure of tickets. Every ticket is composed a quite a few sub-tickets so stories were only really completed at the end. Plus a lot of tickets are blocked by other people or tickets further pushing development timeframe back.

The velocity for sprint 2 is slightly worse than sprint 1. But again this is because of midterms and the availability of all team members with exams and assignements.
